

## **PRODUCT UPDATE MEMO**

**To:** Our Customers  
**From:** Michael Verguldi, Product Manager - Medical  
**Date:** May 21, 2013  
**Subject:** Discontinuing Production of the Millenium™ RO Machine

---

**Background:** We began manufacturing the Millenium Reverse Osmosis (RO) machine back in January of 1999. This machine is designed for the hemodialysis (HD) marketplace to provide industry appropriate water quality for single patient therapies. Since that time, we have built and sold over 6,500 units.

Mar Cor Purification, Inc. (MCP) has decided to discontinue offering the Millenium RO in favor of our WRO 300 and WRO 300 H models for the United States (US) and the new Millenium HX and 700 Series for both US and International markets. We anticipate production of the Millenium to be completed by the end of 2013. Once the remaining units have been assembled and sold, this product will no longer be available.

**Action:** MCP will continue to offer the Millenium RO machine until our remaining production base inventory has been depleted. Our US customers will have the ability to purchase an equivalent device, the WRO 300 and/or the WRO 300 H. The WRO 300 offers the same reliable, high-quality water production as the Millenium, yet with improved user benefits and features. Likewise, the WRO 300 H model offers even more by incorporating a heat disinfection cycle. For both US and International customers, the new Millenium HX portable RO system, which also has heat disinfection capabilities, is available along with the dependable 700 Series RO.

Starting from the Effective Date, MCP will continue to support the Millenium for the next seven years with parts and both technical and field expertise. Customers can continue to receive product assistance by contacting the Technical Support team for any related questions at 1-800-633-3080, Ext. 2904 or by visiting our website at [www.mcpur.com](http://www.mcpur.com) for additional information.

**Effective Date:** To Be Determined once production has ceased and all units have been shipped.

**Note:** MCP is registered with the FDA as a medical device manufacturer, meets FDA's Quality System Regulation (QSR) for medical devices, and has an ISO 13485 certified quality management system. All of our portable RO devices are assembled at our Minneapolis, MN USA facility.

Millenium is a registered trademark of Mar Cor Purification, Inc.
