

PRODUCT BULLETIN #3199A

To: Our Commercial Team

From: Michael Verguldi, Product Manager - Medical

Date: March 5, 2015

Subject: **Millenium™ 750 RO Availability - UPDATE**

The remaining Millenium 750 Reverse Osmosis (RO) machines are all accounted for and will be built, tested and shipped out to our customers over the next few months. As of today it has been removed from our portable RO product line offering and once these have been processed, the Millenium will be officially discontinued. Customers still have access to acquire a basic “cold” series platform by choosing either the WRO 300 or the 700 Series unit. Other options include our “heat” based platform utilizing either the WRO 300 H or the Millenium HX system.

We will continue to support the Millenium 750 RO by offering spare parts, supplies, technical, and field service for the next seven years once the official discontinued date has been established. Customer training on this device has already been removed from our in-house program, but is available on a case-by-case basis and by request only with scheduling through the Technical Support department.

Contact Product Management at Ext. 1244 if you have any additional questions or concerns. Be sure to work with your respective Regional Sales Manager as necessary. More details to follow as the Millenium 750 nears the end of its production life cycle.
