

Mar Cor Purification Announces the Launch of the 4400HX Heat Disinfection Water System for Hemodialysis

Skippack, PA, November 13, 2006 -- Mar Cor Purification announced the launch of the 4400HX hot water disinfection water systems for use in the Hemodialysis market. The 4400HX system is the first fully automated hot water disinfection for both the Reverse Osmosis machine and the distribution system in the US hemodialysis market. The system has a device registration with US FDA 510(k) and Health Canada, making it fully compliant with Hemodialysis regulations in North America.

The 4400HX was developed to meet the increasing water requirements for microbiological control and reduction of operating costs. Heat disinfection is considered to be a more effective process for controlling biofilm and pyrogens than chemical methods. Mr. John Rickert, VP of Sales USA of Mar Cor Purification, said “The dialysis market is moving towards higher water quality and lower operating costs. Any clinic looking out 5 years should consider the 4400HX system to address future water needs. The 4400HX was developed from designs for the Pharmaceutical market which has similar water quality requirements and has broadly accepted heat disinfection for bacteria control.” The 4400HX is available in 4 standard configurations and flowrates that can supply water for up to 35 patients.

Mar Cor Purification has service offices in 15 cities in the US and Canada with six ion exchange resin regeneration plants strategically located in Atlanta, Boston, Chicago, Philadelphia, Montreal and Toronto. We offer support with design engineering capabilities, 24/7 service coverage, field application sales, experienced service technicians, and a fleet of stocked service vehicles. Mar Cor Purification is dedicated to providing innovative solutions through filtration, water, and disinfection technologies. As a wholly owned subsidiary of Cantel Medical Corp. (NYSE:CMN), Mar Cor Purification is uniquely positioned to offer the medical, life science and industrial marketplace hollow fiber membrane filtration, complete water purification equipment and services, and proven sterilant products. We deliver value to our customers by improving product quality, reducing operating costs, protecting capital investments, and safeguarding people’s lives. For more information on Mar Cor Purification, visit our website at <http://www.mcpur.com>.

Cantel Medical Corp. is a leading provider of infection prevention and control products in the healthcare market. Our products include specialized medical device reprocessing systems for renal dialysis and endoscopy, dialysate concentrates and other dialysis supplies, disposable infection control products primarily for the dental industry, water purification equipment, sterilants, disinfectants and cleaners, hollow fiber membrane filtration and separation products for medical and non-medical applications, and specialty packaging for infectious and biological specimens. We also provide technical maintenance for its products and offer compliance training services for the transport of infectious and biological specimens. For further information, visit the Cantel web site at <http://www.cantelmedical.com>
