1. Company and Product Identification

1.1 Identification – Product Name: RoClean L403
1.2 Other means of identification

1.3 Synonym:

1.4 Recommended Use Of The Chemical Name, Address, And Telephone Number Of The Manufacturer, Or Other Responsible Party:

1.5 Competent Person email address

1.6 24 Hour Emergency No.:

RoClean L403
Organic / Inorganic acid mixture
Mixture, none
Reverse osmosis membrane cleaner
Use only as directed on the label.

AVISTA TECHNOLOGIES
140 Bosstick Street
San Marcos, CA 92069
(760) 744-0536

1-202-483-7616 (International Collect)

DRINKING WATER TREATMENT ADDITIVES CLASSIFIED BY NSF INTERNATIONAL TO ANSI/NSF 60 AS STANDARD DRINKING WATER TREATMENT CHEMICAL FOR USE OFF-LINE IN REVERSE OSMOSIS SYSTEMS

2. HAZARDS IDENTIFICATION

EMERGENCY OVERVIEW: This product is a clear, colorless to amber-colored, corrosive solution with a light, disinfectant odor. Depending on the duration of contact, over-exposures can moderately to severely irritate the skin or eyes, or cause burns. This product is neither reactive nor flammable. Thermal decomposition of this product produces irritating vapors and toxic gases (e.g. carbon monoxide, carbon dioxide, phosphorous oxides, and sodium oxide). Emergency responders must wear personal protective equipment (and have appropriate fire-extinguishing protection) suitable for the situation to which they are responding.

Physical Hazards Summary
None

Potential Health Hazards Summary
Acute Oral Toxicity, category 4
Skin irritation, category 2B
Eye irritation category 2 A
STOT repeated exposure category 2

Potential Ecological Effects Summary
The components of this product will decompose into other organic and inorganic compounds over time under normal environmental conditions

2.1 Classification Of Product

U.S. OSHA classification
Corrosive, Skin, eye irritant

Classification as per EC 1272/2008 (CLP/GHS)
Acute Oral Toxicity, category 4
Skin irritation, category 2B
Eye irritation category 2 A
STOT repeated exposure category 2

WHMIS classification
E, corrosive
2.2 Label Elements OSHA/GHS

**Signal Word:** WARNING!

**Hazard statements:**
- H319: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
- H312: Harmful in contact with skin
- H332: Harmful if inhaled
- H314: Causes severe skin burns and eye damage

**Precautionary statements:**
- P280: Wear protective gloves/protective clothing/eye protection/face protection.
- P305: IF IN EYES: rinse extensively with large amounts of water
- P351: Rinse cautiously with water for several minutes.
- P338: Remove contact lenses, if present and easy to do. Continue rinsing. F INGESTED or INHALED Immediately call a POISON CENTER or doctor/physician.
- P310: None

2.3 Unclassified Hazards: None

2.4 Ingredients with unknown acute toxicity: None

RoClean L403 GHS SDS
4. FIRST-AID MEASURES

4.1 Description of Necessary Measures

Skin exposure: If this product contaminates the skin, immediately begin decontamination with running water. Remove exposed or contaminated clothing, taking care not to contaminate eyes. Victim should seek immediate medical attention if any adverse exposure symptoms develop.

Eye exposure: If this product enters the eyes, open victim's eyes while under gently running water. Use sufficient force to open eyelids. Have victim "roll" eyes. Minimum flushing is for 15 minutes. Victim must seek medical attention.

Inhalation: If mist of this product are inhaled, remove victim to fresh air. If necessary, use artificial respiration to support vital functions. Remove or cover gross contamination to avoid exposure to rescuers.

Ingestion: If this product is swallowed, CALL PHYSICIAN OR POISON CONTROL CENTER FOR MOST CURRENT INFORMATION. DO NOT INDUCE VOMITING. Have victim rinse mouth with water, if conscious. Never induce vomiting or give a diluent (e.g., water) to someone who is unconscious, having convulsions, or unable to swallow. If contaminated individual is convulsing, maintain an open airway and obtain immediate medical attention.

4.2 Most Important Symptoms/Effects:

Immediate: Inhalation exposure may cause coughing or sneezing. Symptoms of skin and eye contact may include redness and irritation. Ingestion may cause stomach pains, cramps, and gastritis.

Delayed: Prolonged or repeated skin overexposure to this product may cause dermatitis (dry, red skin). Symptoms may include tingling, redness, and visible injury.

4.3 Indication Of Immediate Medical Attention And Special Treatment Needed, If Necessary:

TARGET ORGANS: Acute: Skin, eyes, respiratory system. Chronic: Skin, eyes, respiratory system

Victims of chemical exposure must be taken for medical attention if any adverse effects occur. Rescuers should be taken for medical attention if necessary. Take a copy of label and MSDS to physician or health professional with victim.
5. FIRE-FIGHTING MEASURES

Flammable properties  Non-flammable aqueous solution

<table>
<thead>

<td>See Section 16 for definitions of ratings</td>
</tr>
</tbody>
</table>

Autoignition Temperature °C:  Not applicable.

Flammable Limits (in air by volume, %):
Upper:  Not applicable.
Lower:  Not applicable.

5.1 Suitable And Unsuitable Extinguishing Media:
This material will not contribute to the intensity of a fire. Use extinguishing material suitable to the surrounding fire.
- Water spray  YES
- Foam  YES
- Halon  YES
- Carbon dioxide  YES
- Dry chemical  YES
- Other  YES

5.2 Specific Hazards Arising From Chemical:
When involved in a fire, this material may decompose and produce irritating fumes and toxic gases (e.g., carbon monoxide, carbon dioxide, phosphorous oxides, and nitrogen oxides).
- Explosion Sensitivity to Mechanical Impact:  Not applicable.
- Explosion Sensitivity to Static Discharge:  Not applicable.

5.3 Special Protective Equipment And Precautions For Fire-Fighters:
Incipient fire responders should wear eye protection. Structural firefighters must wear Self-Contained Breathing Apparatus and full protective equipment. Move containers from fire area if it can be done without risk to personnel. If possible, prevent runoff water from entering storm drains, bodies of water, or other environmentally sensitive areas.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal Precautions
Uncontrolled releases should be responded to by trained personnel using pre-planned procedures. Proper protective equipment should be used. In case of a spill, clear the affected area and protect people.

- Protective equipment
  For small releases (< 20 L), clean up spilled liquid wearing gloves, goggles, face shield, and suitable body protection. The minimum Personal Protective Equipment recommended for response to non-incidental releases (more than 20 L) should be Level C: triple-gloves (neoprene gloves and nitrile gloves over latex gloves), chemical resistant suit and boots, hard hat, and full-face respirator with acid mist and HEPA filter.

- Emergency procedures
  Monitoring must indicate that exposure levels are below those provided in Section 8 (Exposure Controls-Personal Protection) and that oxygen levels are above 19.5% before anyone is permitted in the area without Self-Contained Breathing Apparatus.

6.2 Methods and Materials for Containment and Cleaning Up
Vacuum or soak-up solids liquid for recovery/disposal. Neutralize residue with sodium bicarbonate or other neutralizing agent for dilute acids. Decontaminate the area thoroughly. Test area with litmus paper to ensure neutralization. Place all spill residues in a suitable plastic container. Dispose of in accordance with applicable U.S. Federal, State, or local procedures, or appropriate local standards (see Section 13, Disposal Considerations).
7. HANDLING and STORAGE

7.1 Precautions for Safe Handling
All employees who handle this material should be trained to handle it safely. Open containers carefully on a stable surface. Empty containers may contain residual liquid; therefore, empty containers should be handled with care.

As with all chemicals, avoid getting this product ON YOU or IN YOU. Wash thoroughly after handling this product. Do not eat or drink while handling this material. Avoid generating dust of this product. Remove contaminated clothing immediately.

During equipment maintenance follow practices indicated in Section 6 (Accidental Release Measures) to decontaminate equipment or clean-up small spills. Make certain that application equipment is locked and tagged-out safely if necessary. Collect all rinsates and dispose of according to applicable U.S. Federal, State, or local procedures or appropriate local standards.

7.2 Conditions For Safe Storage
Store containers in a cool, dry location, away from direct sunlight, sources of intense heat, or where freezing is possible. Store away from incompatible materials. Material should be stored in secondary containers, or in a diked area, as appropriate. Storage and use areas should be covered with impervious materials. Keep container tightly closed when not in use. If appropriate, post warning signs in storage and use areas. Inspect all incoming containers before storage, to ensure containers are properly labeled and not damaged.

Incompatibilities
Strong bases, oxidizers, and water reactive materials.

8. EXPOSURE CONTROLS - PERSONAL PROTECTION

Water and other components which are present in less than 1 percent concentration (0.1% concentration for potential carcinogens, reproductive toxins, respiratory tract sensitizers and mutagens).

Balance

None of the other components contribute significant additional hazards at the concentration present in this product. All pertinent hazard information has been provided in this document, per the requirements of the Federal Occupational Safety and Health Administration Standard (29 CFR 1910.1200), U.S. State equivalent Standards and Canadian Workplace Hazardous Materials Identification System Standards (CPR 4).

8.2 Appropriate Engineering Controls.

Use with adequate ventilation to ensure exposure levels are maintained below the limits provided in this Section or as low as reasonably achievable. Ensure eyewash/safety shower stations are available near areas where this product is used.

8.3 Personal Protective Equipment

Respiratory protection:

None needed under normal conditions of use. Use NIOSH approved respirators if ventilation is inadequate to control mists or vapor. If respiratory protection is needed, use only protection authorized in the U.S. Federal OSHA Standard (29 CFR 1910.134), applicable U.S. State regulations, or the applicable local standards. Oxygen levels below 19.5% are considered IDLH by OSHA. In such atmospheres, use of a full-face piece pressure/demand SCBA or a full-face piece, supplied air respirator with auxiliary self-contained air supply is required under OSHA’s Respiratory Protection Standard (1910.134-1998).

Eye protection:

Use approved safety goggles or safety glasses, as described in OSHA 29 CFR 1910.133. Splash goggles with a faceshield may be needed if splash hazards exist.

Hand protection:

Wear chemical impervious gloves (e.g., Solvex™, Neoprene).

Body protection:

If needed, use body protection appropriate for task (e.g., Tyvek™ suit, rubber apron) to protect from splashes and sprays.
9. PHYSICAL and CHEMICAL PROPERTIES

**Appearance**
This product is a clear, colorless to amber-colored liquid.

**Odor**
Light disinfectant odor

**Freezing Point °C**
< 0

**Initial Boiling Point °C**
> 100

**Flammability**
Non-flammable

**Vapor Density (air = 1)**
< 1

**Solubility (in water)**
Soluble

**Viscosity**
Similar to water

**Decomposition Temperature**
NE

How To Detect This Substance (Warning Properties):
Litmus paper will turn red in contact with product.

10. STABILITY and REACTIVITY

10.1 Reactivity
Not considered reactive.

10.2 Chemical Stability
Stable

10.3 Possibility of hazardous reactions
Hazardous polymerization will not occur.

10.4 Conditions to avoid
Avoid mixing with incompatible materials.

10.5 Incompatible Materials
Strong bases, oxidizers, and water reactive materials

10.6 Hazardous Decomposition Products
Thermal decomposition of this product may generate nitrogen oxides, carbon monoxide, phosphorous oxides, and carbon dioxide.

12.2 Persistence and Degradability

The components of this product decompose in soil and water.

12.3 Bioaccumulative Potential

This product is not expected to bioaccumulate.

12.4 Mobility in Soil

When spilled onto soil, this product will infiltrate downward, the rate being greater with lower concentration because of reduced viscosity.

12.5 Other Adverse Ecological Effects

This product may be harmful to aquatic life if large volumes of it are released into an aquatic environment.

13. DISPOSAL CONSIDERATIONS

Preparing Wastes of this Product for Disposal

Waste disposal must be in accordance with appropriate U.S. Federal, State, and local regulations or with local regulations. This product, if unaltered by the handling, may be disposed of by treatment at a permitted facility or as advised by your local waste regulatory authority.

Disposal of Contaminated Packaging

Cleaned containers can be recycled or disposed of as non-contaminated waste, if authorized by your local authorities. Dispose of containers as required by local regulations.

U.S. EPA Waste Number

Not applicable as supplied.

14. TRANSPORT INFORMATION

16. OTHER INFORMATION

16.1 Original Preparation
July 2, 1999

16.2 Revision History
February 19, 2004, 28 June 2013; GHS update

16.3 Prepared by
ADVANCED CHEMICAL SAFETY, Inc.
PO Box 152329
San Diego, CA 92195
(858)-874-5577

16.4 Date of Printing
April 22, 2015
A large number of abbreviations and acronyms appear on a MSDS. Some of these which are commonly used include the following:

**Section 2**
- GHS: Global Harmonization System
- OSHA: U.S. Occupational Safety and Health Administration.
- CLP: Classification and Packaging
- WHMIS: Workplace Hazardous Materials Information System
- STOT: Specific Target Organ Toxicity.

**Section 3**
- CAS #: Chemical Abstract Service index number
- EINECS #: European Chemical Substances Information System index number

**Section 5**
- NFPA: National Fire Protection Association
- Health Hazard:
  - 0 (material that on exposure under fire conditions would offer no hazard beyond that of ordinary combustible materials);
  - 1 (materials that on exposure under fire conditions could cause irritation or minor residual injury);
  - 2 (materials that on intense or continued exposure under fire conditions could cause temporary incapacitation or possible residual injury);
  - 3 (materials that on short exposure could cause serious temporary or residual injury);
  - 4 (materials that under very short exposure could cause death or major residual injury).
- Reactivity Hazard: Refer to definitions for “Hazardous Materials Identification System”.
- Flash Point: Minimum temperature at which a liquid gives off sufficient vapors to form an ignitable mixture with air.
- Autoignition Temperature: The minimum temperature required to initiate combustion in air with no other source of ignition.
- LEL: The lowest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source.
- UEL: The highest percent of vapor in air, by volume, that will explode or ignite in the presence of an ignition source.

**Section 8**
- ACGIH: American Conference of Governmental Industrial Hygienists, a professional association which establishes exposure limits.
- TLV - Threshold Limit Value - an airborne concentration of a substance which represents conditions under which it is generally believed that nearly all workers may be repeatedly exposed without adverse effect. The duration must be considered, including the 8-hour Time Weighted Average (TWA), the 15-minute Short Term Exposure Limit, and the instantaneous Ceiling Level (C). Skin absorption effects must also be considered.
- PEL - Permissible Exposure Limit - This exposure value means exactly the same as a TLV, except that it is enforceable by OSHA. The OSHA Permissible Exposure Limits are based in the 1989 PELs and the June, 1993 Air Contaminants Rule (Federal Register 58: 35338-35351 and 58: 40191). Both the current PELs and the vacated PELs are indicated. The phrase, “Vacated 1989 PEL,” is placed next to the PEL which was vacated by Court Order.
- IDLH - Immediately Dangerous to Life and Health - This level represents a concentration from which one can escape within 30-minutes without suffering escape-preventing or permanent injury. The DFG - MAK is the Republic of Germany’s Maximum Exposure Level, similar to the U.S. PEL. NIOSH is the National Institute of Occupational Safety and Health, which is the research arm of the U.S. Occupational Safety and Health Administration (OSHA). NIOSH issues exposure guidelines called Recommended Exposure Levels (RELs). When no exposure guidelines are established, an entry of NE (Not Established) is made for reference.

**Section 11**
- LD₅₀: Lethal Dose (solids & liquids) which kills 50% of the exposed animals;
- LC₅₀: Lethal Concentration (gases) which kills 50% of the exposed animals;
- ppm: Concentration expressed in parts of material per million parts of air or water;
- mg/m³: Concentration expressed in weight of substance per volume of air;
- mg/kg: Quantity of material, by weight, administered to a test subject, based on their body weight in kg
- IARC - the International Agency for Research on Cancer;
- NTP - the National Toxicology Program,
- RTECS - the Registry of Toxic Effects of Chemical Substances,
- OSHA and CAL/OSHA.
- IARC and NTP rate chemicals on a scale of decreasing potential to cause human cancer with rankings from 1 to 4. Subrankings (2A, 2B, etc.) are also used.
- TDL₀, the lowest dose to cause a symptom and
- TCl₀ the lowest concentration to cause a symptom;
- TD₀, LD₅₀, and LC₅₀, or TC, TC₀, LCl₀, and LCo, the lowest dose (or concentration) to cause lethal or toxic effects.
- BEI - Biological Exposure Indices, represent the levels of determinants which are most likely to be observed in specimens collected from a healthy worker who has been exposed to chemicals to the same extent as a worker with inhalation exposure to the TLV.

**Section 12**
- LC₅₀: The lowest concentration in water which kills 50% of the test subjects.
- EC₅₀: The Effect Concentration in water at which 50% of the test species if affected.

**Section 13**
- US EPA Hazardous Waste Codes: refer to 40 CFR 261.20

**Section 14**
- DOT: US Department of Transportation
- IATA: International Air Transport Association
- IMO: International Maritime Organization
- IBC Code: Merchant Shipping Code

**Section 15**
- RCRA: US Resource Conservation and Recovery Act
- SARA: US Superfund Amendments and Reauthorization Act
- DSL: Canadian Domestic Substances List
- NDSL: Canadian Non-Domestic Substances List
- REACH: European Registration, Evaluation, Authorization and Restriction of Chemicals list
- TSCA: US Toxic Substances Control Act
