CANTEL MEDICAL CORP. ANNOUNCES THE FORMATION OF MAR COR PURIFICATION

LITTLE FALLS, New Jersey (April 18, 2005) - Cantel Medical Corp. announced the formation of **Mar Cor Purification**, formed by the combination of Cantel's Minntech Filtration Technologies Group, and its water treatment companies, Biolab Equipment and Mar Cor Services. "As a combined business, Mar Cor Purification will better serve customers in the medical, biopharmaceutical, food and beverage, semiconductor, and industrial markets. Customers will now have a single source for high quality filtration, water purification, and disinfection technologies," said Andrew Krakauer, Chief Operating Officer of Cantel Medical and the Acting President of Mar Cor Purification.

The focus of Mar Cor Purification will be on delivering proven filtration and infection control technology, supplying high-quality equipment for ultrapure applications, and providing reliable customer service that is unsurpassed in the industry. Mar Cor Purification offers a wide variety of high-performance, ultrapure water equipment, which ranges from simple point-of-use service deionization units to turnkey, large-volume, complex water-for-injection systems. Complete project management is available including custom engineering, system installation and start-up, detailed documentation, preventative maintenance contracts and on-site service. Leading names in filtration and disinfection technologies include Minntech's unique FiberFlo® hollow fiber membrane filters and its Minncare® Cold Sterilant disinfectant products along with the newly developed Minncare Dry Fog™ System.

Mar Cor Purification has service offices in 15 cities in the US and Canada with five ion exchange resin regeneration plants strategically located in Atlanta, Chicago, Philadelphia, Montreal and Toronto. As a global company, Mar Cor Purification is committed to serving the needs of its customers worldwide. It offers an international presence with sales offices in Japan and Singapore, and sales and manufacturing capabilities in the Netherlands. With over 75 years of combined company experience, Mar Cor Purification is ideally suited to lead the way in the filtration, water, and disinfection technology marketplace.

Cantel Medical Corp., a healthcare company, is a leading provider of infection prevention and control products, which include specialized medical device reprocessing systems for renal dialysis and endoscopy, water treatment systems, sterilants, diagnostic imaging and therapeutic medical equipment primarily focused on endoscopy, hollow fiber membrane filtration and separation technologies for medical and non-medical applications, and specialized packaging for infectious and biological specimens. The Company also sells scientific instrumentation products and provides technical maintenance services for its products.
