

Overload/Starter Changes for 23G QS Pumps

Mar Cor Purification is changing the Motor Starters and Overloads for the following kits, OS1223325, OS1223328, and OS1223329, because the manufacturer changed the design of the Motor Starters and Overloads. The kits will have the new Motor Starter and Overload combinations. The new Motor Starters and Overloads are incompatible with the old Motor Starters and Overloads, so the old Motor Starters and Overloads both need replacing with the new Motor Starter and Overloads. These changes apply only to 23Gs made with the QS Tonkaflo pumps. The manufacturer, Allen Bradley, made these design changes to the Motor Starter and Overloads without Mar Cor Purification's knowledge. The new Motor Starter and Overload combinations are in the Table below.

Previous Combination		Replacement Combination	
Motor Starter	Overload	Motor Starter	Overload
OS1223322	OS1223320	3024188	3024187
OS1223323	OS1223320	3024189	3024187
OS1223323	OS1223321	3024358	3024357
